

CONTENTS OF VOLUME 22

Number 1

| | |
|---|----|
| Towards a General Formulation for the Phenomenological Coefficients of Diffusion L_{ij} in Concentrated Random Alloys | 1 |
| JEAN-LOUIS BOCQUET (France) | |
| Creep of TiN-Dispersion Strengthened Stainless Steels | 45 |
| I. BEDEN, S. G. R. BROWN, R. W. EVANS and B. WILSHIRE (UK) | |
| Two Parameter Stability of Short Columns Subjected to a Distributed Axial Compressive Load | 59 |
| K. KANAKA RAJU and G. VENKATESWARA RAO (India) | |
| Measurements of Kinematic and Isotropic Hardening in 304 Stainless Steel during Cyclic Deformations | 65 |
| ERIC J. TUEGEL (USA) | |
| Damage Modelling and Seismic Response of Simple Degrading Systems . . . | 79 |
| U. ANDREAUS, G. CERADINI, P. D'ASDIA and P. GAUDENZI (Italy) | |

Number 2

| | |
|--|-----|
| The Ordering Phenomena in Pt_xTi and Pt_xV ($3 \leq x \leq 8$) Studied by Electron Diffraction and High Resolution Electron Microscopy | 101 |
| D. SCHRYVERS and S. AMELINCKX (Belgium) | |
| Nozzles in Pressure Vessel Heads—A Comparison of Pad and Integral Reinforcements | 151 |
| Y. J. CHAO (USA) | |
| Experimentally Observed Phenomena vis-à-vis Current Constitutive Theories . | 171 |
| MANFRED KORZEN (FRG) | |
| Procedure to Determine if a Set of Experimental Curves are Really Related by Scaling | 185 |
| F. POVOLO and N. FONTELOS (Italy) | |

Number 3

| | |
|--|-----|
| Cyclic Plasticity: The Cyclic Nonhardening Region Model | 199 |
| N. OHNO and Y. KACHI (Japan) | |
| A Review of Creep Rupture in Materials Containing an Amorphous Phase . . | 213 |
| M. D. THOULESS (USA) | |

383

| | |
|---|-----|
| Approche Microstructurale de la Rhéologie des Systèmes Fibreux I. Analyse Théorique | 243 |
| Y. M. HADDAD (Canada) | |
| Three-Dimensional Strains in Toroidal Geometries | 267 |
| H. A. LANG (USA) | |
| Book Reviews | 289 |

Number 4

| | |
|--|-----|
| The Effect of Cyclic Loading on the Slope of the Stress-Strain Curve Immediately Upon Load Reversal | 295 |
| D. KUJAWSKI and F. ELLYIN (Canada) | |
| On Torsion and Shear in a Ring Sector | 301 |
| H. A. LANG (USA) | |
| Development of Thermoplastic Shear Bands in Simple Shear | 313 |
| Y.-L. BAI, C.-M. CHENG and Y.-S. DING (China) | |
| The Effect of Microstructure on the Fatigue Crack Growth Characteristics of Steel in a Dry Air Environment | 325 |
| J. H. BULLOCH (South Africa) | |
| Plasticity—A Limiting Case of Creep | 337 |
| H. CORDS, G. KLEIST and R. ZIMMERMANN (Federal Republic of Germany) | |
